Techie Kids Club Summer Camp
During the summer camp session, children learn coding basics using digital and unplugged activities.

Techie Maps
Kids use Techie Maps to learn about creating commands.

Using puzzle grids, the class works together to plan and encode a programming sequence. Hands-on Techie Maps lessons reinforce problem solving skills to debug programs.

Get in the Loop
Loops are an essential concept for computer programmers.

In this class, Techie Kids learn to loop by practicing a fun dance with their Techie Kids Club coach. Movement and play are a big part of the Techie Kids Club summer session.
