

Techie Tangram

A Tangram is an ancient Chinese geometric puzzle. It's based on a square that is cut into 7 pieces and arranged to create different objects. Tangrams are also perfect to practice problem-solving skills that are important for learning to code!

Instructions:

1. Print the pattern onto cardstock or heavier white paper.
2. Color each piece a different color.
3. Cut out the pieces.
4. Use all 7 pieces to create the house or swan shown below. Then, see what other objects you can form using your Tangram pieces.
